

Garment

does

size

matter!

Arms or legs, hosiery or wrap, whatever compression garment you wear, it is important that it fits properly. Here we explain why.

Too big

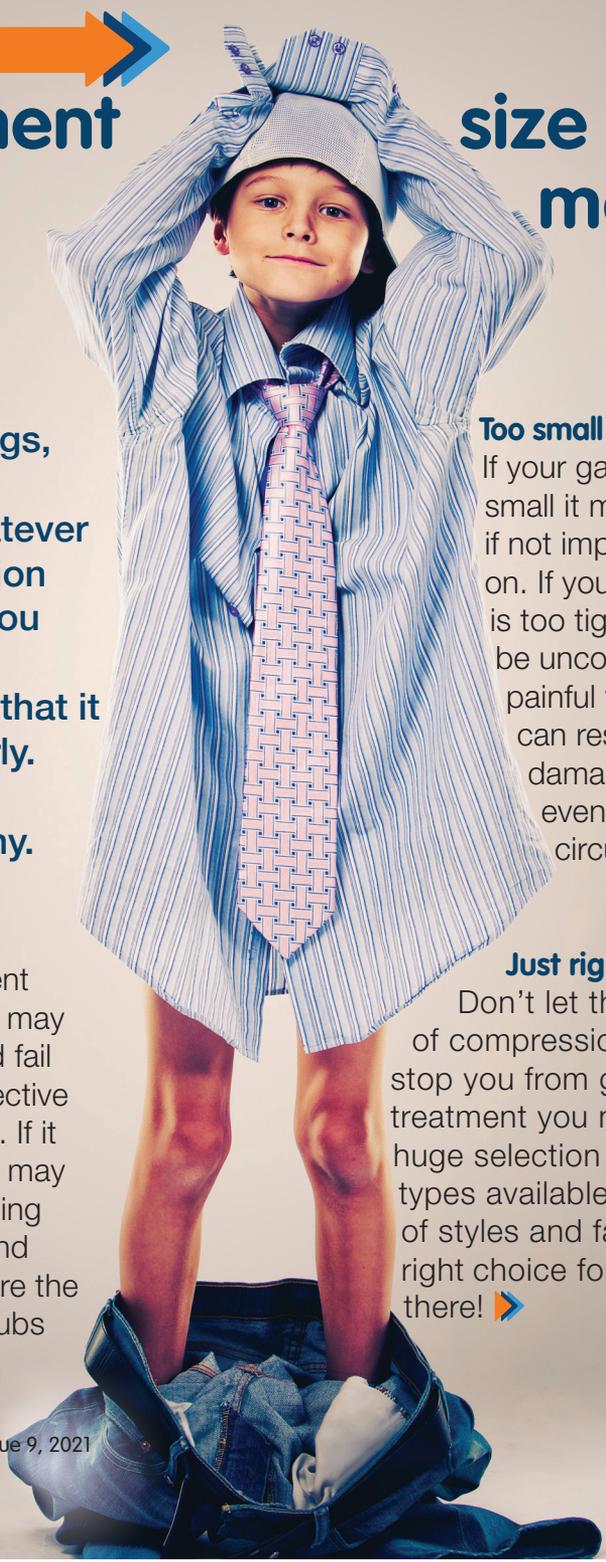

If your garment is too large it may fall down and fail to deliver effective compression. If it is too long, it may wrinkle, causing discomfort and damage where the extra fabric rubs the skin.

Too small

If your garment is too small it may be difficult if not impossible to put on. If your garment is too tight, it may be uncomfortable or painful to wear, and can result in skin damage and may even restrict your circulation.

Just right

Don't let the wrong size of compression garment stop you from getting the treatment you need. With a huge selection of garment types available in a range of styles and fabrics, the right choice for you is out there! ➤

Why use Flamigel® RT

Protecting the skin against
radiotherapy-induced dermatitis with
Flamigel® RT

Flamigel® RT is a hydro-active colloid gel (not a moisturiser/emollient) which delays the onset and reduces the incidence of radiotherapy-induced moist desquamation.

Care advice for Flamigel® RT

- ✓ Creates optimal healing conditions to accelerate cell renewal
- ✓ Reduces redness and irritated skin
- ✓ Protects the skin
- ✓ Reduces pain
- ✓ Hydrates the skin and restores moisture balance
- ✓ Provides a barrier against contamination
- ✓ Cools the skin

Flamigel® RT helps to continue the prescribed radiotherapy treatment by delaying the onset and reducing the incidence of radiotherapy-induced moist desquamation (RIMD).

Care. Always ask your Health Care Professional's advice.

Clean

Clean the skin with clean water or with a specific wound cleanser if advised by your nurse or doctor.

Dry

Dry the skin gently with a clean towel by patting the skin.

Treat

Using your fingers apply liberally Flamigel® RT 3 times per day to the treated area. Use from day 1 of treatment.
